

AIDS: A Case Study for Advanced Biology

Table of Contents

Suggested Materials and Resources	pg. 3
Activity One: Gambling with Exposure	pg. 4
Activity Two: Modeling a Virus	pg. 14
Activity Three: Simulating Viral Replication	pg. 20
Activity Four: Nonspecific Immune Response Analogies	pg. 28
Activity Five: Factors that Affect the Growth of Microorganisms	pg. 35
Activity Six: How Cell Signals Activate Immune Response Genes	pg. 45
Activity Seven: Simulating the Specific Immune Response	pg. 52
Activity Eight: Variations in the Immune Response: Parasites, Vaccinations and Cancer	pg. 69
Activity Nine: Predicting the Progression of an HIV Infection	pg. 78
Activity Ten: Detecting the Presence of HIV Using an ELISA Assay	pg. 87
Activity Eleven: Mutations that Confer HIV Resistance	pg. 90
Activity Twelve: Prevention and Treatment Scavenger Hunt	pg.115
Activity Thirteen: Bioethics, Patents and Drug Development Debate	pg.121
Activity Fourteen: Designing the Perfect Cure	pg.127
Activity Fifteen: How Compliance Affects Drug Efficacy	pg.131
Activity Sixteen: The Evolution of a Virus	pg.137
Activity Seventeen: Community Response to Intervention	pg.142
Activity Eighteen: A History of the AIDS Epidemic	pg.150
Activity Nineteen: Educating the Community	pg.154
Activity Twenty: Funding the Future of AIDS Research, Prevention and Treatment	pg.156
Appendix: Alignment with the AP College Board Standards	pg.158
